Kostas Damianos

Backend developer

OBJECTIVE

Innovative backend developer skilled in Python and Django, dedicated to creating high-performance applications and enhancing user experience through clean code and efficient design.

EXPERIENCE

Remote
May 2023 - Sep 2023
TECH SUPPORT
CQS SA.

- Provided technical support and troubleshooting for software, hardware, and network-related issues, ensuring minimal downtime for users.
- Assisted clients in resolving system errors, connectivity issues, and application bugs, delivering high-quality customer service.
- Documented and maintained detailed logs of technical issues and solutions to enhance the knowledge base and improve future support efficiency.
- Collaborated with engineering and development teams to escalate complex issues and suggest system improvements.
- Guided users through software installations, updates, and configurations, ensuring smooth onboarding and system functionality.

Thessaloniki Greece
Sep 2023 - Present
Backend Developer
Deloitte

- Developed and maintained RESTful APIs using Django Rest Framework (DRF) for scalable web applications.
- Wrote unit tests with pytest and Django's built-in testing framework to ensure reliability**.
- Led backend development, optimizing database queries and enhancing API performance.
- Integrated and deployed applications on Microsoft Azure, leveraging Azure App Service, Azure Functions, and Azure SQL Database.
- Built and deployed LLM-based applications, integrating OpenAI, Hugging Face, and Azure OpenAI APIs for AI-driven solutions.
- Developed LLM-powered chatbots and automation tools, improving user engagement and operational efficiency.
- Implemented CI/CD pipelines in Azure DevOps, automating testing and deployment.
- Collaborated with cross-functional teams to design scalable microservices and AI-driven solutions.

EDUCATION

Kavala, Greece
- Present
COMPUTER SCIENCE
Democritus University of Thrace

SKILLS

- Python
- Django Rest
- Docker
- React
- LLMs
- Celery
- Machine Learning
- Git
- Azure
- .net
- Docker
- Tailwind CSS

LANGUAGES

Greek
Native

English
Advanced. B2

PROJECTS

"**Video-Creator**" is a full-stack video automation project built with Django REST Framework, Celery, and React. It allows users to generate videos using images, text, and audio with seamless backend processing powered by Celery for task management. The React frontend provides an intuitive interface for video customization, while Django REST handles API interactions efficiently. Perfect for automating video creation with a scalable and modern tech stack. Link : https://github.com/kostas2370/Video-Creator

"**BookIy**" is a book indexing app built with Kotlin Jetpack Compose for the frontend and Django for the backend. It allows users to organize, search, and manage their book collections efficiently. With a modern UI and a robust backend, BookIy streamlines book indexing, making it easy to catalog and retrieve book information.
